## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-24 and 32-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Shiraishi et al.

Regarding claims 1, 12, 24, and 32-33, 36-37, Shiraishi et al., discloses a measuring system using robot with features of the claimed invention including a movable chuck movable in an angle with respect to a fixed one, and bending means, and a displacement (or position) sensor. The system also has control microprocessor for related control function (see claim 1).

Regarding claim 2, the test component bends.

Regarding claims 3, 21 the system has force sensor.

Regarding claim 4, the force sensor detects pressure force.

Regarding claim 5, the test component bends.

Regarding claims 6-8, the system shows variety of measurements (see, for example, figure 2).

Regarding claims 9-11, the system has storage for data collection (see, for example, figure 6).

Regarding claims 13-14, the chuck or the clamps can mover relative to each other.

Art Unit: 2855

Regarding claims 15-19, and 34, the measurement is base on programmed functions (see co. 10).

Regarding claims 20, 23, the measurement of the shape data (figure 9) and sample displacement (figure 16) are indication of angle measurements

Regarding claim 22, the fatigue is being measured which is indicative of crack consideration (see figure 27).

***Response to Amendment***

3. Applicant's amendment and arguments filed 5/23/05 have been fully considered but they are moot in view of the new ground of rejection.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire THREE MONTHS from the date of this action. In the event a first response is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than SIX MONTHS from the date of this final action.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
